WORK EXPERIENCE

Full Stack Developer Upwork

02/2024 - Present

Responsibility

- Developed **end-to-end applications** using the **Node.js**, delivering scalable and responsive solutions tailored to client requirements.
- Integrated AI/ML models using Python, TensorFlow, and Scikit-Learn to add intelligent features like predictions and automation.
- Designed and deployed **RESTful APIs** with **Node.js & Express.js**, integrating secure authentication (JWT/OAuth) for seamless user experiences.
- Optimized front-end performance using **React.js**, **Tailwind CSS**, and **Bootstrap**, improving UI/UX and increasing client engagement by **30%**.
- Collaborated closely with international clients, gathering requirements, delivering prototypes, and refining solutions for production.
- Deployed and maintained applications on AWS, Railway, and Vercel with CI/CD, ensuring performance and scalability.

Frontend Developer Kairiz Cyber Technologies

06/2024 - 09/2024

Islamabad

A tech company specializing in digital solutions, web development, and cybersecurity services.

Achievements/Tasks:

- Developed responsive user interfaces using **HTML**, **CSS**, **JavaScript**, and **Bootstrap**.
- Created a **personal Portfolio website** to highlight skills, completed projects, and resume, using CSS for styling and proper section structuring.
- Built a **responsive Login Page** replicating a given design, enhancing skills in layout structuring and styling with Bootstrap and CSS.
- Implemented a functional **Web Calculator** using JavaScript for basic arithmetic operations.

EDUCATION

Bachelor of Science in Computer Science Riphah International University

01/2022 - Present

CGPA: 3.87/4.00

SKILLS

HTML5 & CSS

Tailwind CSS

Bootstrap

JavaScript

Node Js

React Js

Node Js

RESTful APIs

MongoDB

MySQL

Firebase

Python

Version Control System

PROJECTS

KinZoo Energy Protocol Freelance Project

04/2025 - Present

Tech Stack: React, Node.js, MongoDB, Web3.js, Railway
Tasks/Achievements

- Developed a full-stack crypto mining platform with **OKX Wallet authentication** (Web3.js), enabling 5,000+ secure user logins.
- Implemented a **24-hour mining session system** with real-time energy tracking (11,526+ current energy) and referral program integration.
- Built admin dashboard with energy statistics (Total Energy, Current Energy, Invite Energy metrics)
- Designed user-friendly interface for mining operations, referrals, and session management

Airbnb Booking Application Freelance Project

04/2024 - 08/2024

Tech Stack: Node.js, Express, MongoDB, EJS, Passport.js, Cloudinary, Mapbox, Render

Tasks/Achievements

- Built a full-stack rental platform with **EJS templating** for SEO-optimized server-side rendering.
- Implemented **Passport.js authentication**
- Integrated **Cloudinary** for image management & **Mapbox API** for interactive property maps
- Developed **CRUD operations** for property listings with MongoDB aggregation pipelines
